Company overview

Websites and digital menus for restaurants and cafés.

Growthly Corporation Systems

Growthly designs and develops websites and digital menus for restaurants and cafés. The work brings together the business identity, its content and practical information in an experience adapted to phones, tablets and computers.

The Restaurant Pack provides a defined scope for creating or redesigning a business website. The proposal uses the restaurant's identity and authorised materials and is presented before payment.

The Restaurant Pack

Total price	EUR 350 · One payment · VAT included
Proposal	A personalised proposal before payment.
First draft	The first draft has an indicative timeframe of 24–48 hours once all required materials have been received and validated.
Publication	The website is published after the final version has been reviewed and approved.

- Design and development of a personalised, responsive website.
- Digital menu, authorised photographs and restaurant information.
- Opening hours, location, contact details and social media links.
- Contact and reservation requests by email.
- Domain, hosting and SSL certificate included during the first year.
- Website publication, support and minor adjustments.

A shared working process

We gather the materials and prepare the proposal for the restaurant to review before paying. If it continues, we confirm the project and payment, apply the agreed adjustments and publish after final approval.

The review before publication covers content, links, contact channels and presentation on different screen sizes. The first-draft timeframe is separate from the final publication date.

Ongoing support and additional work

Maintenance and support for minor updates to existing content are included without a time limit or additional recurring fee.

Full redesigns, additional languages, new functionality, external integrations and changes of scope require a separate quotation.

Restaurants and agencies

Restaurants can request a proposal for their own business. Agencies and consultancies can present a project or a collaboration proposal.

For agency collaboration, we coordinate the scope, deliverables and white-label presentation before work begins.
